AUTOMATION TEST ENGINEER

AI & Automation Test Engineer with 2+ years of experience in web, mobile, API, and IoT testing. Skilled in Playwright, Selenium, and CI/CD pipelines with a growing focus on AI-assisted testing and intelligent automation. AWS and ISTQB certified, with a solid foundation in cloud infrastructure and modern DevOps practices. Experienced in applying AI tools for test optimization, data generation, and defect analysis to enhance quality and delivery speed. Collaborative team player in Agile environments, driving test efficiency, innovation, and continuous improvement.

TECHNICAL SKILLS

Cloud Platforms (AWS, Azure)	Frameworks (Playwright, Cypress, Selenium, Appium)	C/I and C/D (Jenkins, GitHub Action)
OS Management (Windows, Linux)	API Testing (Postman, Playwright)	Collaboration tools (Jira, Confluence, Teams)
Coding languages (JavaScript, Typescript, Python, SQL and C#)	Log management (Datadog, Prometheus)	Configuration Languages (YAML, JSON)
AI-Augmented Testing (Playwright MCP, GitHub Copilot, ChatGPT, n8n)	Performance & Load testing (Jmetre)	

PROFESSIONAL EXPERIENCE

Inugo Systems Ltd

Test Engineer

Sept 2024 - June 2025

Collaborated towards Industry leading Parking solutions. Designed and set up end-to-end automation testing from scratch using Playwright for a complex platform, and integrated it with GitHub Actions to support CI/CD. I also created and maintained test cases based on user stories, improved story documentation for better clarity, and carried out thorough manual testing on both web and mobile apps. Alongside this, I tested APIs and hardware components, including IoT and AI-enabled devices, and regularly monitored logs in staging and production to catch and resolve issues early. Worked closely with cross-functional teams in an Agile environment and contributed as a reliable, collaborative team player. Tested inbuilt billing systems with payment gateway APIs to confirm expected outcomes as per functional test requirements.

Auckland Council

Web Developer

Jan 2024 - May 2024

Built responsive websites and custom web apps using HTML, CSS, JavaScript, and Node.js. Improved performance, created user-friendly forms, and documented cloud architecture best practices. Worked collaboratively in an Agile team environment. Performed Manual and Automation testing of the website to ensure the stability and reliability of the website through the development process. AWS resource management and cost forecast provided to product manager to help with budgeting of the cloud servicing. Integrated with CI/CD for code quality and testing and deployments. Presentations toward stakeholders from Auckland council with success of this Project going into production by Council.

MVP Studio
Test Analyst

Nov 2022 - August 2023

Worked on online course platform. Created and maintained test suites using C# and Selenium, and performed API testing with SoapUI and Postman using JSON and XML. Helped improve team efficiency by mentoring junior testers and sharing knowledge. Bug Management by ensuring collaborative approach. Used git for version control and pull requests to allow team work for merge into master branches. Participated in weekly stand up to address update and blocker to help team find collaborative approach to shared sprints.

EDUCATION

Digital Technology Product Solution (Level 5 & 6)
Mission Ready

Diploma In Business (Level 5 & 6)
Tasman International Academies

CERTIFICATIONS

AWS Cloud Practitioner
Amazon Web Services

ISTQB - Foundation Level
International Software Testing Qualifications Board
